
NICHOLAS M. THOMPSON

EDUCATION

University of Maine, Orono – B.S. in Civil Engineering, Minor in Business Administration, 2005

PROFESSIONAL CERTIFICATION

FAA Remote Pilot – small Unmanned Aircraft Systems (sUAS) Airman certificate

EMPLOYMENT HISTORY

February 2016 to Present - Sevee & Maher Engineers, Inc., Civil Engineer
2008 to 2016 – Olver Associates Inc., Winterport, Maine, Resident Engineer
2005 to 2008 – Sargent Corporation, Stillwater, Maine, Field Engineer

PROFESSIONAL EXPERIENCE

Mr. Thompson has over 12 years of engineering experience primarily focused on civil and construction projects. Mr. Thompson is a dedicated field engineer, experienced at interpreting plans and specifications, coordinating with contractors to ensure proper construction, and interacting with contractors and owners to assist whenever requests for changes to design drawings or specifications occur.

Typical assignments in his various areas of expertise include:

- Field Engineer on landfill projects. Monitor construction, including Quality Control and Quality Assurance of composite liner and cover systems, drainage systems, and earth embankments.
- Prepare daily progress reports and maintain records of quantities;
- Communicate with contractors to investigate and develop plans in order to avoid potential conflicts;
- Supervise heavy civil construction projects such as new landfill construction, stormwater projects, road construction, and site work;
- Manage crews and equipment;
- Develop schedules and materials lists to assure task completion on a daily and weekly basis; and
- Assist design teams on plan review.
