EXPERIENCE

Ms. Forrester's experience includes the following:

- Designed wastewater treatment processes upgrades, collection system upgrades, and municipal landfill caps.
- Monitored project budgets and communicated updates to the project team.
- Engineering project duties included construction oversight, collecting field samples, and preparing feasibility studies, compliance reports and permits.
- Wrote site-specific construction specifications and bid proposals.
- Conducted research on business negotiations among emergency service providers. Setup and administered a statewide survey and met with local emergency response officials to discuss results.
- Teaching Engineering, Drafting, Business, and Math courses to students in the Portland Naval Shipyard's Apprenticeship Program.
